

5 REASONS TO TRY **SELECT HV[®] ETCH**

35% Phosphoric Acid Etchant

Rx Only

1 **High Viscosity**

Offers pin-point placement making it ideal for etching enamel margins, otherwise known as the selective or “hybrid” etch technique. However, it can be used for the total-etch technique as well.

2 **Unparalleled Bond**

Creates microretentive surfaces that are necessary for successful bonding. Published research proves that BISCO etchants produce higher bond strengths to (wet or dry) dentin¹ and enamel.

3 **Blue Color**

For easy visualization and contrast.

4 **Easy Wash Off**

Rinses away cleanly and quickly, leaving no residue to interfere with bonding.

5 **Easy Handling**

Designed to offer maximum handling and precise placement, while eliminating run-on onto the occlusal dentin surface.
